EDUCATION

- Purdue University** Jan. 2021 – Dec. 2025 (Exp.)
Ph.D. in Computer Science (Machine Learning / Optimization) Grade: 3.9/4.0
M.S. in Statistics & Computer Science (along the way) M.S. conferred May. 2024
- Xi'an Jiaotong University (XJTU)** Sep. 2016 – Jun. 2020
B.S. in Computer Science (Qian Xuesen Honors College) Grade: 85.7/100
Selected Awards: “Siyuan” Scholarship (twice); National 2nd Prize in Mathematical Contest in Modeling of China (top 3%)

PROFESSIONAL TECHNIQUES

Machine learning: deep learning optimizer, federated learning, recommendation system, deep reinforcement learning, adversarial training
Programming: Python, MATLAB (Proficient); Shell script, C/C++, R, Java, SQL, HTML;
Packages / Tools: PyTorch, NumPy, Matplotlib, Linux Command, Git (Proficient); scikit-learn, TensorFlow, Pandas, Slurm.

INDUSTRY EXPERIENCE

- TikTok, Machine Learning Engineer Intern** May. 2024 – Aug. 2024
Worked on **ranking models in ads recommendation systems** Manager: [Du Zhang](#), [Dr. Yan Yan](#)
 - Delivered two launches that improved advertiser value by 1.63% and 5.94%, a **\$X0,000 increase in daily profits**
 - Applied neural architecture search to select the best features and embedding sizes, reducing the model size while improving accuracy
 - Adapted Deep Cross Network as the feature crossing module for improved conversion rate (CVR) prediction on sequential data

SELECTED PROJECTS

- ▷ Department of Computer Science, Purdue Advisor: [Prof. Brian Bullins](#)
 - Deep Learning Optimization | Faster Acceleration for Steepest Descent**
 - Proposed accelerated steepest descent for ℓ_p -smooth functions based on the interpolation of steepest descent and mirror descent
 - Derived convergence rates for convex and (stochastic) non-convex settings, and implemented the optimizer with PyTorch
 - Achieved faster convergence and higher precision than Adam and Lion on **ImageNet and pre-training large language models**
 - Optimization & Federated Learning | Federated Composite Saddle Point Optimization**
 - Proposed the first distributed optimization algorithm for min-max problems with non-smooth structure-inducing regularization
 - Derived convergence rate, wrote the optimizer with PyTorch, and conducted distributed learning experiments with FedLab
 - Applied the optimizer to the **universal adversarial training** on l_1 -regularized logistic regression with real-world data
 - Achieved **faster convergence and better structure** (e.g. sparse solution) than (projected) gradient-descent-ascent
- ▷ Institute of Artificial Intelligence and Robotics, XJTU Advisor: [Dr. Hanbo Zhang](#), [Prof. Xuguang Lan](#)
 - Deep Reinforcement Learning | Hindsight Trust Region Policy Optimization**
 - Proposed a deep reinforcement learning algorithm that improves **sample efficiency** in environments with **sparse reward**;
 - Applied goal-conditioned policy with **(weighted) importance sampling** to learn with both succeeded samples and failed ones.
 - Proposed a Quadratic KL constraint with **math-provable variance reduction** to stabilize training;
 - Implemented experiments with PyTorch on games with image input and robot motion planning simulation in OpenAI Gym.

SELECTED COURSES

Machine Learning (ML): Statistical ML, ML Theory, Computer Vision, Data Mining, Artificial Intelligence, etc.;

Math & Statistics: Convex Optimization, Probability, Mathematical Statistics, Computational Statistics, Multivariate Analysis;

Computer Science: Data Structures, Algorithms, Database, Machine Structure, Operating Systems, Networks, etc.

TEACHING & ACADEMIC SERVICE

Purdue CS571 Artificial Intelligence TA (Fall 23)

Purdue CS182 Foundations of Computer Science (Discrete Mathematics) TA (Spring 23)

Purdue CS251 Data Structures and Algorithms TA (Fall 21, Spring 22, Fall 22)

.....

- ICLR 2025, 2024
 - NeurIPS 2024, 2023
 - ICML 2025, 2024
 - AISTATS 2025, 2023
 - AAAI 2025
 - TMLR
